ERIECONOMIZE

Erie fares are now so low that it is wasteful to go any other way than by rail. Wasteful of money, wasteful of nervous energy.

All Erie through trains are air-conditioned. You ride and sleep in quiet and comfort, insulated against cold, heat, and dust.

The meals are excellent. The autumn and winter scenery is a perfect delight to the eye all the way.

At the present reduced fares it is doubly wise to Erieconomize.

A table of fares is shown on page 31 of this time table.

Where Mite is Right

● Classed among the smallest pieces of rolling equipment on the Erie, midget scale test cars serve a purpose most important to shipper and railroad alike. Their sole use is to maintain the highest standard of accuracy in the many huge track scales located on the Erie.

These scale test cars are only one of the many ways Erie protects shippers' interest—assures accurate weights—saves them time and money.

With fast freight handling equipment, improved signaling devices and new equipment, Erie makes deliveries on time—and safely. Let the Erie agent show you how to save on your next order.

SAFETY FIRST HINTS—Carefulness on your part helps eliminate accidents. Don't get on or off a train in motion; wait for a full stop. Keep hand baggage out of car aisles; this will remove a cause of inconvenience, possibly of harm, to others. Walk carefully when entering or leaving train; high-heeled shoes are sometimes a cause of tripping or stumbling on car steps. A Signal that says—

PROCEED
with
CAUTION

THE steady march of railroad progress is vital to agriculture, industry and the Nation It cannot continue if railroads are burdened with laws and regulations increasing their costs of operation or handicapping them in competition for business Such a proposal is that to limit the length of freight trains to 70 cars, which will cost the railroads more than one hundred million dollars annually and add nothing to safety or service.
