# WHY THE PROPOSED ERIE-LACKAWANNA MERGER IS IN YOUR INTEREST

Merger of the Erie Railroad and the Delaware, Lackawanna and Western Railroad to form a new company to be known as the Erie-Lackawanna Railroad Company, is now under consideration by the Interstate Commerce Commission.

Managements of both companies, important shippers and scores of public officials have gone on record favoring the merger as being economically feasible and in the public interest. Such a merger will result in a larger and stronger company, better able to meet the challenges faced by the railroad industry.

As a user of railroad passenger service, we believe you are also interested in the future of this form of transportation. In this brief message, we would like to give you the background of this proposed merger.

It is apparent that Congress and other government agencies will be appropriating more and more of the taxpayers' money for the support and promotion of airways, waterways and highways. In the last five years, the various federal, state and local governments have spent more than \$48 billion for the support of these competing transportation facilities.

As examples of this government help to railroad competitors, consider the St. Lawrence Seaway, with ship tolls which do not cover the operating cost; the federal highway program used for the construction of free throughways, the extensive airport expansion program to accommodate the huge jet airliners, or the \$18 million appropriated recently for expansion of a bus terminal by the New York Port Authority.

Part of the huge taxbills paid by the railroads to these governing bodies is used to support these competitors of the

railroads. None is spent to help the railroads. Admittedly, the railroads are struggling to exist against these mounting threats of subsidized competition.

Instead of seeking government handouts, and as an example of self-help, the Erie Railroad and the Delaware, Lackawanna and Western Railroad are asking for approval to merge their properties. Because both railroads parallel each

other for substantial distances in the area east of Buffalo, there are opportunities to reduce costs and improve their competitive status.

Among the many benefits to be derived from such a merger is an indicated increase in earnings, before federal income taxes, of \$13 million annually within a five year period. These increased earnings will benefit all segments of the public—employees, customers, investors, suppliers and communities. Shareholders and bondholders of both companies have given overwhelming approval to the merger proposal.

Congress has encouraged mergers for the solution of recurring railroad problems. In approving another merger earlier this year, the Interstate Commerce Commission cited

such actions by individual railroads as "part of a general and inevitable movement in the railroad industry toward greater efficiency and economy in railroad operation."

Obviously, one strong railroad system can do a much better job than two weaker railroads. The public generally will benefit from a reduction in the cost of, and an improvement in the quality of, the rail service of these two important carriers.

This merger should be welcomed as a forward step in the development and preservation of a good system of railroad transportation.

*Erie-Lackawanna merger will be clearly in the public interest because it will:*

- \* Provide more efficient and economical transportation
- \* Enable the combined lines to offer improved service
- \* Attract new industries to the areas served
- \* Strengthen competitive position of combined railroad
- \* Generate additional traffic volume
- \* Stimulate capital improvements in railroad property
- \* Stabilize employment opportunities
- \* Restore earning power

## Reading of Tables

On all tables, the schedule of each individual train is shown in a separate column. Each train has an operating number which appears at the top of the schedule column.

Train times from 12:01 a.m. (Midnight) to 12:00 Noon inclusive, are printed in light-faced figures; 12:01 p.m. (Noon) to 12:00 Midnight are printed in dark-face throughout the timetable.

Trains make regular stops only at stations where time figures appear in column opposite the station name. Symbols are opposite some schedule figures. They are important. They indicate exceptions and should be checked carefully with the explanation under Reference Notes at the bottom of each page.

When trains are shown as Stopping Conditionally at a Station, passengers should advise Station Agent, in advance, of their intention to board train or notify Conductor of intention to leave train, as case may be.

On main line Table 4, where a station name is indented, that station is located on a Branch Line or connecting service.

The equipment of principal trains is shown on pages 9, 10, 23 and 24. Coach equipment is carried on all trains.

Any Erie Ticket Agent or representative will be glad to assist you with information and reservations.
