

All clear—all the way!

This is what is known as an oversize shipment—one that has to be carefully checked to be sure there is safe clearance under bridges, at curves and other points on the railroad.

The Erie is famous for having the highest and widest clearances of any eastern railroad—an advantage that explains why many oversize shipments such as this are routed over Erie tracks.

This advantage is supplemented by Erie's famed heavy-duty roadbed and Erie's progressive rail-

roading—the constant effort to improve the safe, dependable transportation of passengers and freight. Here you have one of the many reasons why so many shippers say "Route it Erie!" and travelers say "Go Erie!"

In times like these, when defense preparations call for extra effort, the Erie is ready at all times to play its part as the country's first line of defense in transportation . . . along with all the railroads of America!
