

"A Good Story about the ERIE"

"The Speediest Service we ever heard of."

In an unsolicited letter, Mr. I. J. Freedman of The American Tube Bending Co. of Niles, O., says:

"We want to express our appreciation of the way The Erie handled a car of boiler tubes consigned to the Republic Iron & Steel Co. at Youngstown.

"Our customer had advised he was in very urgent need of this material. Loaded at noon, this car was pulled out of our plant a half hour later and delivered to the consignee at 8:30 a.m. the next morning.

"This is about the Speediest Service we ever heard of, and surely breaks all records. Service of this kind is bound to increase good will for the railroad and also the good will of the manufacturer's customers who are fortunate to get such service."
