

It Drinks 200 Gallons a Mile

● The Iron Horse is a heavy drinker. Erie freight locomotives use as much as 200 gallons of water per mile. Water for steam to send these giants roaring down the rails at a faster clip than ever before.

Erie spends tremendous sums for chemical treatment of this water—insuring greater locomotive efficiency. Erie locomotives are specially built for high-speed heavy-duty work.

They represent one of the reasons why *your freight* will be delivered on time—and safely. One of the reasons why Erie is “first in freight.” On your next shipment call an Erie agent.
