

# THE COLOSSUS OF ROADS

● You've heard of long railroads—ever hear of a high, wide one? Between New York and Chicago the Erie has the highest and widest clearance of any railroad, and it is built and equipped to carry the heaviest loads.

If you ship massive machinery or ponderous parts, that fact may save you money. You can move complete units over the Erie and move them faster.

But even if your product is as small as pens or pencils, the Erie's wide clearances should be of interest to you. They indicate that the Erie has been planned and is operated for the best interest of shippers. When it's trusted to the Erie, the freight must go through—safe and fast, and to your satisfaction. Call your Erie representative for full details.
